Attachment to Paper No. 30 (Advisory Action)

1. The proposed amendment(s) will not be entered because:

a. they raise new issues that would require further consideration and/or search. The

proposed amendment would require a search for and/or a motivation to make a "purified

osteogenic protein being not associated with other osteogenic proteins with which it is normally

associated in vivo". The proposed amendment would require further consideration of a device

comprising "a matrix that does not comprise a synthetic polymer or demineralized bone".

b. they raise the issue of new matter. The examiner cannot find support for the

limitation a "purified osteogenic protein being not associated with other osteogenic proteins with

which it is normally associated in vivo" at page 40, lines 7-11 and 19-22.

2. The affidavit, exhibit or request for reconsideration has been considered but does NOT

place the application in condition for allowance because: Applicants arguments are directed to

the proposed amended claims and the amendments to the claims have not been entered.

3. Applicants' response would have overcome the following rejection(s) if the proposed

amendments had been entered:

a. The rejection of claim(s) 2, 3 under 35 U.S.C. 112, second paragraph, over the

recitation of "conservative amino acid sequence variants".
